Casiopea

2017

The first thing we can appreciate when viewing this mirror is its rounded triangular shape with a tendency to become an ellipse. This concept is repeated on a concentric basis creating an elliptic-kinetic effect that portrays (as an idealized caricature) the kinetics of the stellar orbits. In spite of the apparent bidimensionality of its three rings it is especially interesting the different sections along its profiles, since these vary three-dimensionally which enhances the dynamism of its curves.

Lo primero que podemos apreciar al ver este espejo es su forma triangular redondeada con tendencia a convertirse en elipse. Este concepto se repite de manera concéntrica produciendo un efecto elíptico-cinético que retrata (como una idealizada caricatura) el cinetismo de las órbitas estelares. Pese a la aparente bidimensionalidad de sus tres anillos resulta de especial interés las diferencias de sección en sus perfiles, ya que estos van variando tridimensionalmente, lo cual aumenta el dinamismo de sus curvas.
